CS/1389

CS/1390 cm L59 P59 H73,5 HS45

CS/1390 (metal frame)

Four-legged tub chair featuring a tubular metal frame and a snug polycarbon shell. The soft and cozy shape of the seat is emphasized by the colourful rim which provides an additional touch of class. The coloured outline is obtained with an innovative double mould technique. The shell will be available in two versions: clear with a contrasting rim and matching frame, or fully coloured with a chromed frame. The plastic carter which covers the base junctions matches the colour of the frame. The maximum width of this item is only 59 cm; this means that 8 chairs fit around an extended 130 cm Baron table.

CS/1389 cm L59 P59 H73,5 HS45

CS/1389 (wooden frame)

Chair featuring a wooden frame and plastic shell. Rim and seat are the same colour. The square tapered legs are joined to the frame and embrace the shell, creating a very well harmonized integration of shapes.

Boheme

CS/1393
CS/1392

Two new items add to the best-selling CS/1257 Boheme chair: a low back chair (80 cm high) and a stool (65 cm high). Both are upholstered with regenerated thick leather, matching the colour of the round, varnished, tapered legs.

GTR

Fixed metal table with a varnished central base and a round, transparent or opaque glass top. The 60 mm wide central column is slightly curved and features three slimmer (35 mm wide), visibly curved branch-like arms. These spread out to support the glass top which is held fast by three thermo-welded steel flanges. This sophisticated design recalls elements of nature.

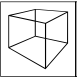

Skin

CS/1391

This co-injected chair in polypropylene at differentiated charge is produced with the air-moulding technology. The external surface is photoengraved like the Basil chair CS/1348. Its design is essential, yet sophisticated with sharp corners blending into soft and curvy lines. This is the first polypropylene model in the Calligaris range with a square-section leg (as opposed to Area51 CS/1042 and Hero CS/1085 with their circular section leg). The chair is suitable for external use, stacks up to six high and comes with neutral nylon foot glides.

MILANO 2012 PREVIEW

KOKOS

BUCHE

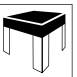

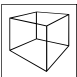

A new wood based material will be introduced beside the standard finishes. This biomaterial is a composite thermoplastic polymer and is called liquid wood. It is produced with widely available renewable raw materials and is recyclable. One of the most interesting features, other than its biocompatibility, is the technology behind the production of this material which is moulded like any common thermoplastic polymer with the advantages of offering great versatility and an extremely simple production process. Its main components are lignin and cellulose, which are the compounds forming the cells of plant stems, together with hemicellulose.

Heron

CS/4070-Q 140
CS/4070-R 160
CS/4070-R 220

Varnished fixed metal table featuring square section legs joined to the corners of the top and adjustable feet. The polyurethane top, sandwiched between two metal panels, is shaped and finished with matt epossidic powders. The colour of the plates which join the legs match the colour of the top. The strengths of this model are the high stability, the extreme lightweight, slim legs and slender top (only 3 cm) making this model classy, essential and extremely easy to match.

Sigma

New table and console range with wooden or glass tops which associates the Omnia frame to a new rectangular base recalling the design of the Modern table. This model offers new life to an extremely neutral table like Modern, upgrading it with high level finishes, improved extending mechanisms, aluminium gliding rails, wheels positioned under the extending base and the well-tested Baron mechanism.

Taupe

Manta	CS/1396	Frame: P176 Matt taupe Shell: D09 Taupe
-------	---------	--

Air

CS/1395

New metal folding chair in the Air range. The main feature is an 18 mm wide circular section frame with a telescopic folding device on the back leg. This system prevents accidental closing and guarantees maximum safety during use. The design is quite elegant and sophisticated, making this folding chair extremely versatile. Two pieces can be hung on the Flat hook.

Link

CS/1397

Varnished metal chair featuring a bi-colour plastic seat, a 30x15 mm rectangular section frame and a 30x10 mm curved ergonomic backrest. Stacks up to six high. The seat is woven with an innovative double moulding technique which produces a contrasting zigzag pattern. The colour of the seat rim matches with the frame.

This seat fits also on the Exia model.

Etoile

CS/1423 - CS/1423-LH - CS/1424 - CS/1424-LH

This chair features a moulded cold-expanded polyurethane foam shell which offers long-lasting comfort. The narrow and rounded seat profile, with its clean and soft lines, maintains an excellent ergonomic performance. The upholstery (leather or fabric) is glued to the padding and adheres perfectly to the shell, preserving and enhancing the overall design of this model. The frame is available in two versions: a rectangular section wooden leg with rounded corners or a semi-conical tapered metal leg.

Manta

CS/1396

Armchair with four round cone-shaped legs and a snug shell. The multilayer seat and curved metal back are upholstered with thick leather which matches the colour of the legs. The maximum width of this product is only 54 cm, which means that 8 chairs can fit around an extended 130 cm long Baron table CS/4010.

Echo

CS/4072-R

New metal table with automatic extending glass tops (like the Tower table CS/4057-R). The central metal column is varnished and matches the colour of the base which is also rectangular. A decorative inlayed detail between base and column contributes to a lighter visual impact of the column. This model is also very stable thanks to the ballasted base.

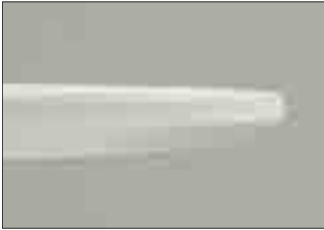

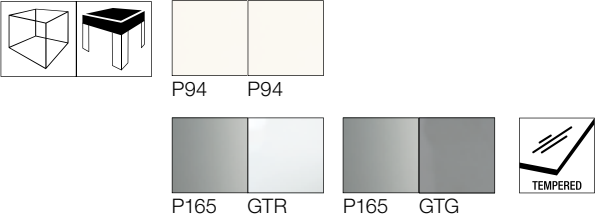

cm L140(190)(240) P100 H75

Sassi

CS/5082-LQ - CS/5082-LR - CS/5082-VQ - CS/5082-VR

Coffee tables featuring a central cross-shaped blade base and a 60 mm central supporting column. The tops have irregular shapes, rounded corners and bevelled edges on the top in the glass version and on the bottom in the MDF/wood version.

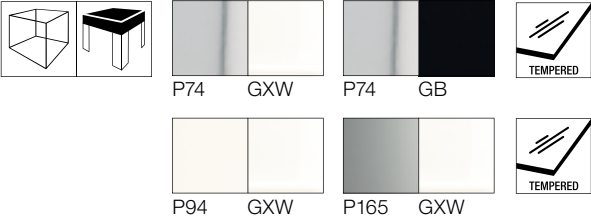

Happy

CS/4066-VR - CS/4066-VQ

Extendible metal table with glass top. The frame is entirely made in aluminium and the square section leg measure 38x38 mm. The top is embedded in the frame which features a rounded edge. The glass extension is stored under the top, in correspondence of the semi-automatic mechanism. The legs are always external (opening and closing system similar to the Dakota table CS/5078-G). The gliding legs are equipped with soft rubber wheels which facilitate this operation, and a safety lever, similar to the one installed on the CS/4047 Convoy table, is present under the top. The frame is available in varnished or shiny aluminium.

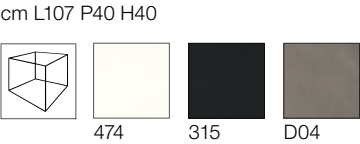

CS/4066-VR cm L120(180) P80 H75
CS/4066-VQ cm L80(130) P80 H75

Shape

CS/5083

This bench features an internal 18 mm curved multilayer structure, upholstered with thick leather. The seating surface is lightly padded and has two side pockets. Owing to the reduced dimensions, this item is extremely versatile.

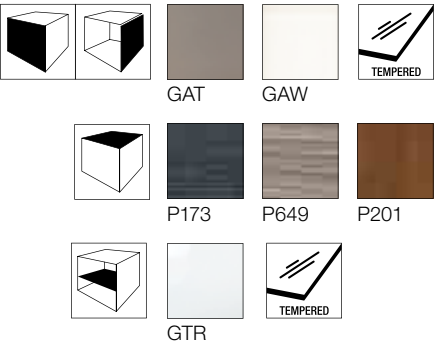

Shelter

CS/6038

Cabinet range featuring 8 mm thick acid etched glass sides and doors. The top consists in an embedded 13 mm thick veneered tray with an upstand in Folding. Sides and doors practically reach the floor and are slightly distanced from ground thanks to hidden and adjustable feet. The interior is dressed with melamine, like model CS/6029 and the wooden shelves are also finished in melamine. Doors open and close with an assisted mechanism.

- CS/6038-6** cm L122 P52 H166 4 door storage cabinet

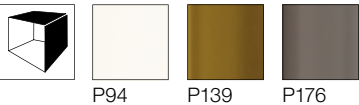

Inside

CS/6039

Range of open hanging cabinets made of MDF and varnished with powders which create a lightly embossed effect. The front edge is cut to a 45° angle. Each element is 28 cm deep and can be matched with any 35 cm deep Inbox unit, generating spectacularly dynamic wall compositions. These units share the same heights and widths as the Inbox range (40, 80 or 120 cm). For the larger versions (80 and 120 cm), fixed matching partitions will be also available.

CAT. 3

The entire colour range of Denver fabric is available for sofas, armchairs and ottomans.
Kama fabric includes two new colours: Mustard yellow and Laguna blue.

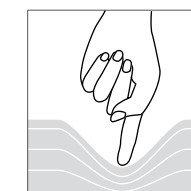

Alameda

CS/3363 (design Bernhardt&Vella)

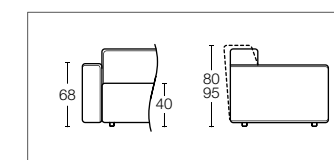

Contemporary sectional sofa available in numerous combinations.

Despite its linear aspect, this model offers unexpected comfort and softness, thanks to the padding, which is bulky and slightly rounded. The most interesting detail of this sofa is the seam which creates a decorative profile around the armrests and backrest. A special gas spring mechanism enables the regulations of the backrest, offering maximum comfort at all times.

By simply leaning against it, the backrest rises 15 cm while shifting backwards, with a 10° inclination.

SOFT

Sectional sofa featuring a gas assisted mechanism to adjust the backrests (except for the corner unit).

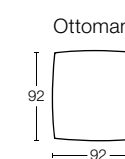

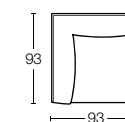

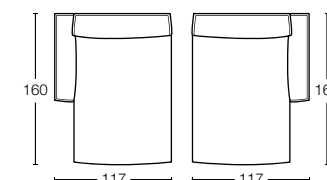

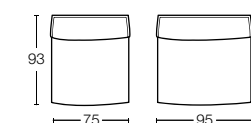

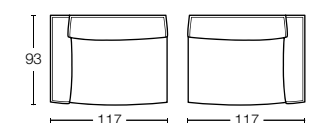

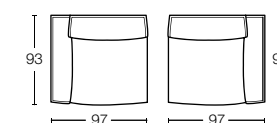

Frame: solid wood, multilayer wood, chipboard.

Spring system: Greek spiral-springs in the seat.

Padding: cushions in expanded polyurethane at differentiated densities (D30+D25) and polyester staple fibre.

Upholstery: all fabrics and leathers available in the sofa swatch range.

Foot: 2,5 cm, non-slip, polypropylene foot.

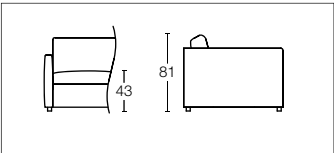

Alyon

CS/3362 (design Pininfarina)

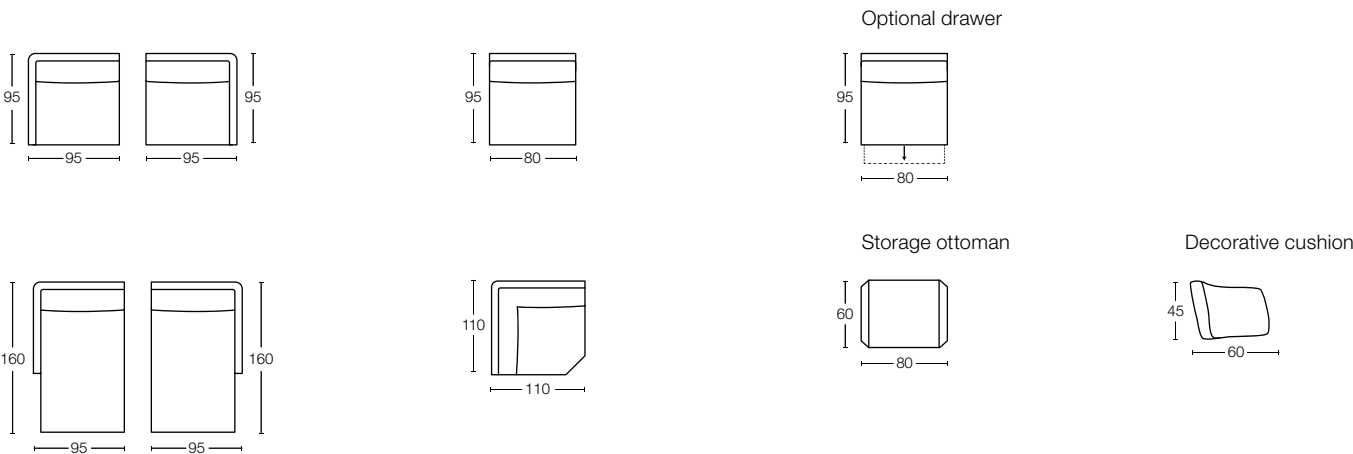

Highly distinctive and notable sectional sofa which stands out for its design, functionality, flexibility, comfort, and versatility in small spaces. The backrests offer great comfort and support, whereas the seat depth makes this sofa suitable both for relax and conversation. The corner unit is designed as a spacious single seating space. The central unit features an optional storage drawer. Although the ottoman top is lightly padded, the surface is quite rigid. An internal storage compartment contains a soft cushion which can be placed on the ottoman to ensure the perfect seating comfort. The ottoman can be then easily stored under the chaise-longue. The striking and unmistakable trademark of Pininfarina is the sculpture-like chaise-longue support which recalls the details of a luxury car.

SOFT
Partially removable fabric or leather covers (seat and backrest cushions).

Frame: solid wood, multilayer wood, chipboard.
Spring system: Greek spiral-springs in the seat, elastic belts in the back.
Padding: seat cushions in expanded polyurethane at differentiated densities (D30+D25) and feather mix, backrest cushions in feather mix
Upholstery: all fabrics and leathers available in the sofa swatch range.
Foot: 2,5 cm, non-slip, polypropylene foot; Matt Silver P165 varnished polyurethane support for the chaise-longue.

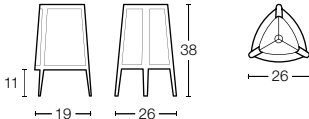

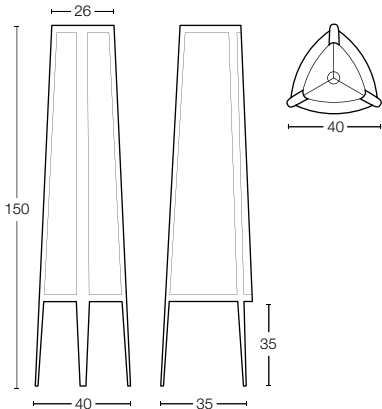

Allure

CS/8020 (design Studio 28 - Gino Carollo)

Sophisticated and thin lamp available in the floor and table versions. The cotton diffuser produces a warm, suffused light. Its size is sufficiently compact to fit in any contemporary home. The metal frame silhouette is visible through the fabric and is exposed in the lower part, where it becomes floor support. The light source is screened by an opal methacrylate disc. A low consumption light bulb is supplied with the lamp.

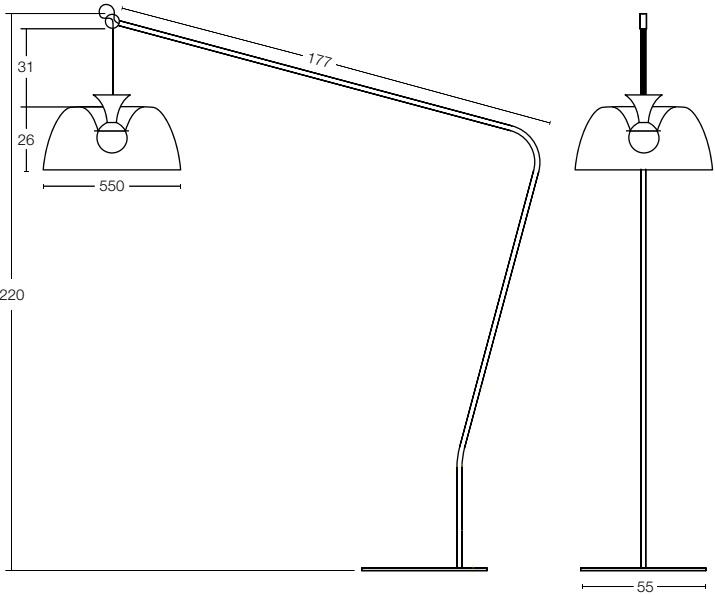

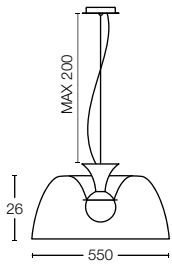

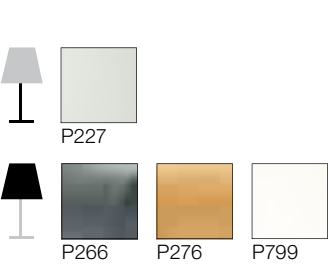

Arpège

CS/8019 (design Studio 28 - Gino Carollo)

Suspension or arch lamp featuring a transparent or coloured thermoformed methacrylate cap. Easily adaptable to residential and working environments, this airy and essential lamp produces a warm and suffused light.

Cora

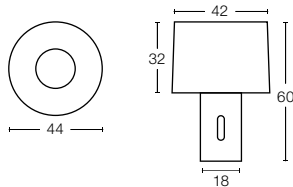

CS/8021 (design Fabio Bortolani)

Cora is a tribute to nature, to trees and to simplicity. The slotted cylindrical base, made with a curved multilayer oak sheet, recalls the trunk of a tree. The fabric lampshade, which represents a crown can be freely combined with any base colour.

This essential and strictly geometric model conceals two independent light sources: one of which illuminates the environment while the second, positioned internally, creates a soft atmosphere through the front slot.

A set of low consumption light bulbs is supplied with the lamp.

Conrad

7143

Pure wool rug. The particular weaving technique highlights the contrasting colour patterns in relief.

The essential, neutral and discrete Scandinavian design brings a touch of warmth and personality to any living area in the house.

Available colours: shades of beige and shades of grey.

cm 170x240 - cm 200x300

Glanville

7147

Beautiful plain colour rugs, hand tufted from fine wool. The high density yarns provide a very compact aspect which makes any modern environment welcoming and warm. These discretely elegant, comfortable and timeless carpets suit the style of any household.

Available colours: beige, brown, taupe.

cm 170x240 - cm 200x300 - cm 200x200 - cm 240x240

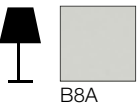

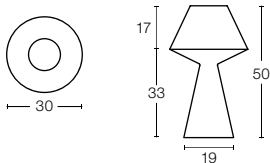

Sophie

CS/8023 (design Armando D'Andrea)

Table lamp with thin metal structure, dressed with Lycra fabric.

The interchangeable ribbon around the silhouette can really alter the look of this object.

Multistripe

7145

The Multistripe rug is hand tufted from fine wool. The striped pattern in shades of soil brown fits perfectly in any modern living area by adding an ethnic and sophisticated touch.

Available colours: shades of beige or brown.

cm 140x200 - cm 170x240 - cm 200x300

Nat Nat

7146

This coarse wool rug is hand knotted. The natural colouration changes from item to item, presenting chromatic variations and differences which are the proof of an authentic and genuine style.

Available colours: shades of beige or grey.

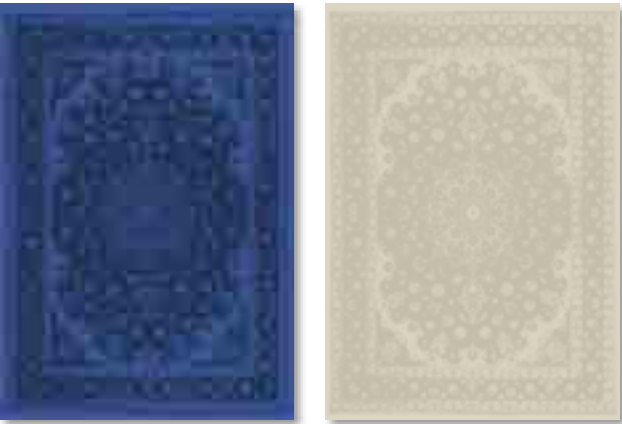

cm 170x240 - cm 200x300

Odessa

7142

This large carpet is a pure decorative item which re-interprets the Persian style through new materials and unique colours. The chenille is mechanically woven into the cotton base. The relief effect is the result of the irregular shaving of the surface.

Available colours: shades of beige, grey, taupe, blue, prune.

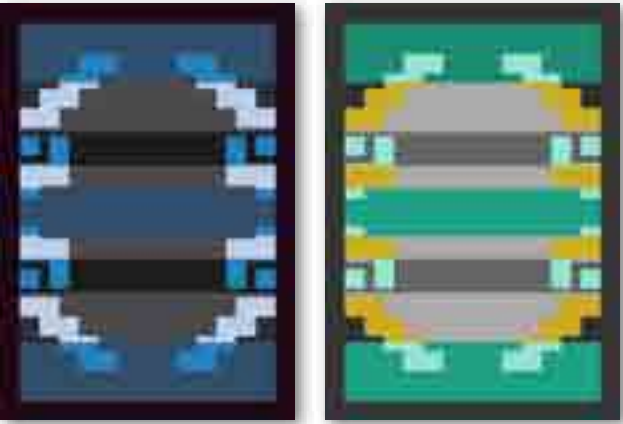

cm 170x240 - cm 200x300 - cm 240x340

Raritan

7141

Pure wool rugs crafted with a special hand knotting technique which produces a beautiful flat surface with no superficial fuzz. The contemporary pattern recalls the classic “kilim” rugs. The bright and eye-catching colours match perfectly and are purposely innovative and in fashion.

Available colours: the base comes in shades of grey and the geometric pattern is available in different hues of blue, red and jade green.

cm 170x240 - cm 200x300

Stars

7067

This best-selling carpet in the Calligaris collection is now available in a new colour. Its round shape represents a perfect solution for any room which needs a new original look. It is also ideal to instil new life in a particular area, creating a well-defined focus point.

Available colours: blue with white decorations.

cm ø220

Very Flat

7144

Simplicity is the main feature of the Very Flat collection. This light-weight carpet resembles a raw wool mat. Although the style is quite vintage, the colours are warm, bright and carefree.

Available colours: mustard yellow, blue, sand, grey.

cm 170x240 - cm 200x300 - cm 240x340
